

***QThink is pleased to announce the expansion of its India Design Center as a result of the company's exceptional execution, customer satisfaction and demand***

To accommodate the rapid growth of its engineering team, and better meet the high-technology needs of its clients, QThink's India Design Center has recently moved to a newer, larger facility in the heart of the Koramangala business area.

"I am very happy to announce that we have made the move to our new office," states Rahul Malvi, QThink India Design Center Manager. "QThink's yearly engineering headcount growth of 50% has been a direct result of our exceptional execution and track record. This move clearly demonstrates QThink's commitment to SoC design services, and prompts a very positive message to our client base regarding QThink's global presence."

The two-story facility allows further expansion of QThink's engineering team and provides an adequate number of meeting and conference rooms to accommodate all aspects of design reviews and customer meetings. In addition to work space expansion, and in order to create a more productive atmosphere, this new, modern-looking facility is equipped with vast array of amenities, such as a terrace for social gatherings and client events and a soon to be added gymnasium.

Another fringe benefit of the office is its strategic location in the heart of Koramangala, which offers numerous advantages to the company's employees and clients. Koramangala was selected for its widely acclaimed reputation of being a great place to live, as well as its close proximity to a large QThink employee base, "With the usual traffic congestion of Bangalore, being close to work is a great benefit. The design

QThink

center location combined with QThink amenities in the new office will help us continue attracting top engineering talents,” adds Malvi.

Since its opening in 2005, QThink’s India Design Center, has continuously added talented engineers to both the Design Verification and the Physical Design teams, earning a reputation for itself as a highly-skilled, integrated circuit design group in India. QThink’s India DC has booked and delivered designs from around the world, including such places as: Europe, APAC and India. This center has also augmented the QThink DCs in San Diego and San Jose, California, and continues to support the expansion of QThink’s global presence.

QThink’s new India Design Center is located at:

**QuantumThink Technologies Pvt Ltd,  
"Innova Pearl", 1st & 2nd floor,  
No.17, 5th Block,  
Koramangala Industrial Layout,  
BANGALORE 560 095**

### **About QThink®**

**QThink®** is a world leader in providing ASIC and SoC design services to leading-edge semiconductor companies world wide. **QThink** offers flexible technical and business engagement models with customer design interfaces covering architecture and specification to logic design and verification to physical implementation. **QThink’s** robust and optimized methodology, coupled with an extensive team of design experts, has continuously demonstrated on-time and right-by-construction silicon tapeouts. **QThink’s** vast pool of engineering experts are engaged with complex designs from 130nm to 45nm, targeting broad market requirements from low-power handheld to high performance networking and storage devices. **QThink** has successfully delivered over 200 designs to date. **QThink** has strong partnership and collaboration with EDA vendors embracing the state of the art design automation tools.
